Lacquered Patinated Brass

➤ HOW TO CARE FOR YOUR PRODUCT

If unlacquered, Brass is an organic material and will react to its environment. Spots will form, but over time they will fade and self-correct. With use, the characteristic of brass will develop and it may take up to a year to acquire a full patina. To maintain the appearance of the bright brass use Brasso Metal Polish. Apply with a soft cloth and polish with a dry soft cloth before the polish has completely dried. Repeat if necessary.

To clean the antiqued mirror glass, lightly spray the cloth with a proprietary non-smear glass cleaner. Hodgson Sealants glass cleaner is recommended. Rub the damp lint-free cloth over the surface of the glass to remove the dirt. Using a second cloth, polish the surface of the glass. Repeat the procedure if necessary. Please ensure that any cloths used are checked for grit or dust that could scratch the glass.

➤ HANDLING AND FITTING INSTRUCTIONS

The mirror is to be fitted on split battens which are situated on the back of the mirror ready • The wall should be assessed prior to installation to see what the make up is • It is important that the split battens that are fixed to the wall are installed level and secure before lifting the mirror onto them • It is recommended to wear gloves when handling the brass frames.
